## Profile:

An experienced **Environmental Consultant** with a background delivering results for clients in environmental compliance and risk mitigation including developing and implementing environmental management systems. A strong working knowledge of applicable regulatory guidelines and uses best practice methodologies to achieve solutions which meet the needs of clients and are environmentally sustainable.

## Position Summary:

**Enviro Works Ltd** 2010 - 2017  
Independent Environmental Consultant

**Wellington Regional Council** 2008 - 2010  
Environmental & Waste Water Adviser

**Lumens Energy** 2003 - 2008  
Environmental Scientist

## Key Areas of Focus:

**Planning and Policy:** Working with clients on risk assessment and streamlining the resource consent process including catchment management and network consenting

**Social Impact Assessment & Monitoring:** Providing initial and ongoing assessment and monitoring to mitigate risk

**Environmental Incident Management:** Responsive approach to finding solutions and working with regulators and stakeholders to achieve best outcomes for all with particular expertise in the oil and gas and manufacturing industries

**Greenhouse Gas Emissions & Carbon Footprinting:** Energy waste auditing and management

**EHS Training, Auditing & Compliance:** Assisting clients to implement robust and compliant EHS and policies and providing training to EHS teams

**Industrial Site & Trade Waste Management:** Developing and implementing innovative solutions to manage site discharges and trade waste

## Key Projects & Achievements:

- Assessment of human risk for residents in new subdivision from an underground fuel plume. Provided independent report and recommendations which eliminated risk to residents and were cost effective for the developer
- Led the planning and design process for several landfill sites throughout New Zealand to be re-developed into parks and playing fields
- Provided an environmental impact assessment report and recommendations for the Highfields Business Park development to ensure the adjacent waterfront and wetlands were protected. This included management of discharge and run-off, designing green areas, ponds and replanting to protect native species
- Developed and wrote Environmental Policies for high risk manufacturing sites including management of hazardous waste, and delivered training to staff to achieve ISO90034 accreditation
- Member of expert panel providing recommendations on the Rena Oil Spill in 2011 to minimize impact on the environment

## Qualifications:

**Victoria University, Wellington** 2000 - 2002  
Bachelor of Environmental Science

## Other Training & Courses:

**BP Energy** 2006  
Effective Management of Oil Spills & Gas Leaks
